

# Secure remote access control - from anywhere at anytime

## Small device, big benefits: Secure Remote IP access to your servers

### Peppercon LARA eco

- KVM and remote IP access to any connected device via the Internet
- Works with any operating system in BIOS mode, during reboot and under Blue Screen conditions
- SSL encryption and certification protection against unauthorized access
- No need for additional software licenses
- Faster video performance over IP
- Optional remote power control module available

Peppercon's LARA® eco is a KVM over IP solution. The smallest device of its kind, LARA eco is elegantly engineered to offer a complete remote IT management solution with a wide range of critical features.

At Peppercon, we've combined our unique KVM IP technology with SSL encryption and high-quality video. It's all in one easy to handle device - elegantly engineered to save you space, time and money
