The perfect switch for desktop or rack mount installations

The Raritan family of KVM (keyboard, video, mouse) switch products provides reliable, central control of multiple computers for the simplest to the most complex requirements. CompuSwitch is Raritan's economical, multi-platform, single-user KVM switch and is available with models for 2, 4, and 8 computers, expandable to control up to 64 computers. Its industrial strength, desktop, or rack mount chassis makes CompuSwitch an ideal choice for corporate server rooms, computer test labs, and rack mount applications. CompuSwitch will help eliminate the cost and clutter of unnecessary equipment, help reclaim space, and will improve operational productivity for a host of applications:

- ▶ Network server management
- ▶ Multi-workstation operation
- ▶ Hardware/software development and testing labs
- ▶ CTI and other OEM rack mount applications

Premium performance and reliability

CompuSwitch is built with Raritan's unique, intelligent emulation technology, which dedicates an individual processor to each connected computer so that each computer always sees its own keyboard and mouse. This prevents keyboard and mouse lockups and ensures flawless boot up and operation of any mix of computers running any operating system.

CompuSwitch is available in 2-channel, 4-channel, and 8-channel models. Connect any mix of PCs (PS/2 or AT), Suns, and Macs, running any operating system and cascade CompuSwitch units to control up to 64 computers. Raritan's unique keyboard and mouse emulation ensures flawless operation.

Installation is as easy as connecting computers with our tangle-proof, coaxial, double-shielded cables, available in lengths of 2, 6.5, 13, 20, and 30 feet. Simply plug in your keyboard, monitor, and mouse to operate.

Select computers directly by touching the individual channel buttons on the front panel of CompuSwitch or by using hot-key commands from the keyboard. Standard features like AutoScan and AutoSkip make operation simple and convenient. To extend computers and cascade units, use Raritan's Cat5 Reach® and FiberReach® II.

CompuSwitch 4- and 8-channel models are also available in a 1U, industrial-strength, rack mount chassis with a built-in cable support bracket for a neat, professional installation.
