About Raritan

Raritan is the leading provider of KVM (keyboard/video/mouse) and remote management solutions for access and control of servers and other network devices. With 18 consecutive years of profitable growth and technical innovation, Raritan makes products that are used to control millions of servers at more than 35,000 network data centers, computer test labs, and multi-workstation environments around the world.

From the small business to the global enterprise, Raritan's compatible and scalable KVM, serial, and remote connectivity products offer IT professionals the most reliable, flexible, and secure out-of-band solutions. Our complete line of products not only helps to manage IT equipment, but also improves operational productivity.

Raritan provides four core building blocks for anytime, anywhere access and control of all servers and network devices through one simple, seamless interface.

1. KVM Switches

Raritan revolutionized the enterprise segment of the KVM market with the introduction of Paragon®, the world's first Cat5-based KVM product. Paragon is the most reliable, most flexible, and most secure enterprise-class KVM solution on the market that offers Cat5 Simplicity™. Other Raritan KVM solutions include: Z-Series™, MasterConsole™, CompuSwitch®, and SwitchMan®.

2. Serial Device Control

Raritan's serial console solutions provide out-of-band management of serial devices including UNIX servers and other IT equipment. The Dominion™ family of management appliances provides secure, remote access and control of up to 32 target servers and other serial devices over IP from any Web browser. Raritan also offers ConsoleSwitch™, which enables local serial console access to up to 32 servers for one or two users.

3. Remote Access and Control

Raritan offers an array of solutions for extending KVM access to servers and other IT devices — including the power of connecting over IP. IP-Reach™ is the fastest, most secure way for one or more users to remotely access and manage their servers over IP from any Web browser. Other Reach products include FiberReach® II and Cat5 Reach®.

4. Centralized Device Management

For enterprises that deploy multiple Raritan KVM switches and serial console appliances connected to hundreds or thousands of servers and other IT devices, Raritan's CommandCenter™ provides an intelligent, centralized solution to manage all target devices from anywhere via a simple but secure browser interface.
